

the

group

is grateful; you are holding this document.

VISION STATEMENT

Provide value for money through simple solutions to difficult problems. You will automatically enter the wealth-generating spiral and lead your nation to glory!

MISSION STATEMENT

- To deliver projects without time and cost overrun with uncompromising Quality and Safety standards.
- To create a culture that motivates, nurtures and excites our people in pursuit of excellence through continued learning and self-improvement.
- To uphold the Satyakiran Group's cherished value of contributing to society to improve the quality of life.

WHY SATYAKIRAN

- Over 90 experienced; enthusiastic & customer focused Professionals!
- Proven, proprietary methodology!
- Continuous up gradation and dynamic flexibility!
- Customized services, trainings, and facilitation, our exclusive mentoring!
- No one-size-fits-all, cookie-cutter approach!
- We work to your schedule, not ours!
- No-nonsense pricing, always!

OUR GOAL

A smile of satisfaction on your face and some words of appreciation for us!

MORE ABOUT US

Please ask for specific profiles of each group companies separately, to know details on how keen and well-equipped Satyakiran is, to attend to your needs in its entirety.

If you still think we are not close enough to you..

INTRODUCTION

Satyakiran started off 35 years ago in 1970 as an insurance and tax consultancy. The group has now ventured into diverse businesses like healthcare, engineering and quality.

- **Satyakiran Healthcare Pvt Ltd.:**

Is a highly specialized, advanced, medical diagnostic center, offering digital X-ray, whole body CT, whole body & color Doppler Ultrasound, Mammography, ECG, TMT, Echo-cardiograph, Tele-radiology, Pathology and special investigations. Haryana's Premier and only ISO 9001:2000 certified private sector diagnostic facility situated in Sonepat – a northern suburb of Delhi, catering to a large population.

- **Satyakiran Engineers Pvt Ltd.:**

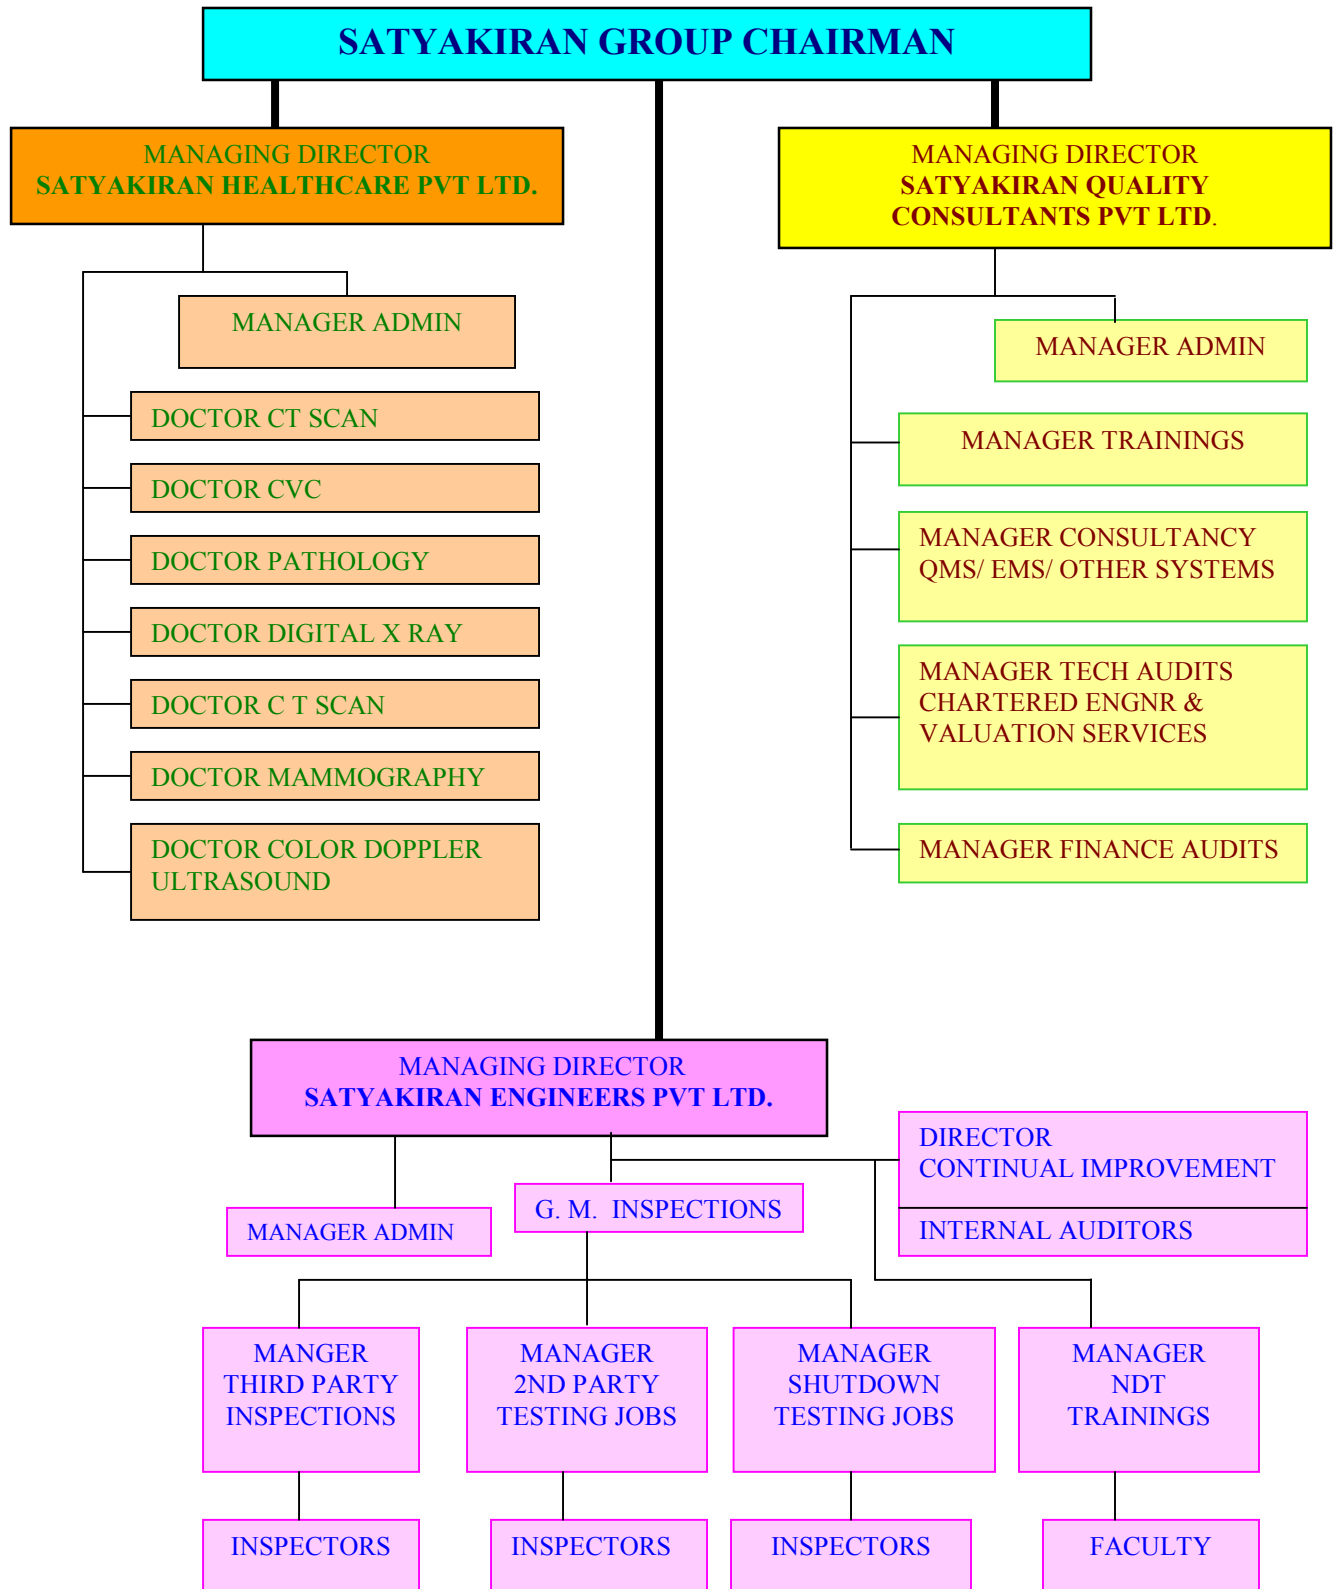

From a humble beginning in 1990, the company has acquired reputation par excellence in testing and inspection services. The company is rated amongst the top in the country for offering ASNT Level – III services in eight NDT methods and Level – II services in another three methods. Your testing requirements can be fully serviced, complete with equipments, consumables and personnel on contract basis. Third Party Inspection Services of the company find favor with global companies sourcing goods from India. Company also operates a wholly owned NDT institute – ‘Satyakiran School of Non- Destructive Testing’- the first and **only ISO 9001:2000 certified NDT institute in the country** engaged in training & certification of QC personnel of Indian Airlines, RITES Ltd, DNV etc amongst others. These certifications are recognized worldwide.

- **Satyakiran Quality Consultants Pvt. Ltd.:**

Is a young enterprise which has branched out from Satyakiran Engineers Pvt. Ltd in 2002 to assume fully independent operations in QMS, EMS, HACCP, OHSAS, TS, Six Sigma and SA 8000 Consultancy services. Other specialty services include ERP implementation; Information System Audits & Energy Audits. The company has a very strong human resource in highly qualified professionals with over 10 to 15 years of experience. Insurance & Taxation consultancy services are now continuing under this banner with financial consultancy and tax audits.

- **Satyakiran Foundation.:**

is a trust, run by the group companies and headed by the group chairman Mr. Satya Parkash Gupta, engaged in charitable social services. It has supported education of the needy, calamity aids, medical care and community projects.

A. THIRD PARTY TECHNICAL AND COMMERCIAL INSPECTIONS:

1. Pre-Shipment Inspections ("Third Party")

Pre-Shipment Inspections ("Third Party") are created to ensure that the materials are properly packaged, marked and palletized for shipment; always verifying that the documents are complete and correspond with the goods being sent. Satyakiran Engineers (P) Ltd. shall provide a written report on each inspection done to support all details about the cargo. Clients may request pre-shipment inspections by asking their supplier to allow an Independent Surveyor Company to conduct an inspection at the supplier's site.

- ✓ **Shipping Documentation:**
We verify the materials being shipped with the shipping documentation.
- ✓ **Product Verification**
For the client's protection, the quantity of each item number, part number, or product code can be verified to help avoid shortage claims or claims that lower-priced items were shipped instead of the higher-priced items requested.
- ✓ **Packing Inspection**
Any claims for damage or breakage may arise and your customer or the freight carrier may assert that the goods were inadequately packed. Satyakiran Engineers can verify the packaging of the goods shipped. Blocking and bracing of the shipment will be documented if the shipment is containerized or shipped via trailer.
- ✓ **Shipment Condition**
Visual inspections are performed to check for damage, and report on the overall condition of the shipment.
- ✓ **Photography**
Photographs are taken to prove all the findings on the inspection report. These can provide important information in the event of any discrepancies. By comparing the photographs taken during the pre-shipment inspection with those taken at the destination can provide accurate information about how the shipment was handled, reasons for damage, and it may help us find ways we can change to prevent damages. Photographs may also be provided so that you can monitor the fabrication or assembly progress.
- ✓ **Witness Of The Loading Process**
If your shipment requires loading a container or a trailer, we recommend that the inspector follows the materials through the loading process. At the end, the inspector can confirm the process with the application of a seal to the container or trailer.

2. Source Inspections

Satyakiran Engineers (P) Ltd. provides a variety of services including Monitoring, Expediting, Dimensional Inspections, Non Destructive Examination, In-Process Inspections, Laboratory Analysis, Sample Collection, Final Inspections, Photography, and issuance of Certificates of Inspection. Our inspectors are available to travel to any destination you require.

- ✓ **Monitoring**
We monitor tests and testing procedures at the fabricator's place of business. We also monitor the fabrication process of equipment and products and report on the progress.
- ✓ **Expediting**
In a fabrication process there are many things that can interfere with the time of delivery. It is very critical for businesses to have on-time delivery. Our Expediting Department will contact vendors until the project is complete and verify transportation arrangements in order to prevent any critical delays.
- ✓ **Non-Destructive Examination**
Our inspectors are experienced in reading NDT results. We witness a number of testing including visual inspections, liquid penetrate, magnetic particle, and ultrasonic testing.
- ✓ **Dimensional Inspection**
Our inspectors are experienced in taking precision measurements and working with numerous types of measuring instruments and gauges. Satyakiran inspectors are able to check surface hardness, surface smoothness, and the thickness of coatings.
- ✓ **In-Process Inspection**
Our inspectors can follow the goods that are in process by supervising the whole process.
- ✓ **Sample Collection**
Our inspectors will adequately pack all samples to ensure the safe arrival at its destination. If at any point during the inspection process laboratory analysis is required, we can use private laboratories to get the desired information.
- ✓ **Final Inspections**
We can perform Final Inspections by visually verifying that the fabricated and/or assembled goods are in conformance with the client's requirements.
- ✓ **Certificates of Inspections**
We will be able to issue "Certificates of Inspection" (quantity/quality/...) when requested or where appropriate. We can also assist in obtaining "Certificates of Compliance" from the suppliers.

3. Commercial Inspections

Satyakiran Engineers (P) Ltd. is prepared to serve an extensive market, a variety of sectors through the global community.

We cover a variety of fields including agricultural, chemical, consumer products, food safety, whether raw, semi-finished or finished products commodities. Iron and steel sector along with other metal inspections is our core strength area.

4. Weld Inspections

The majority of larger clients employs welding inspectors on a full time basis but require from time to time during larger pipeline or plant construction qualified welding inspectors. The inspectors of Satyakiran Engineers (P) Ltd. are qualified and the services they provide on site are numerous, ensuring contractual specifications are adhered to, welder qualification tests, producing welding procedures, interpretation of X or Gamma ray radiographs, monitoring welding on pipeline barges and various other tasks.

Satyakiran has a large selection of qualified inspectors who are at our client's disposal during the phases of new construction, maintenance and shutdown projects. We provide a comprehensive range of specialist Engineers to the oil and gas power and general Industry.

5. NDT Level III Consultancy ; Inspections and Procedure approval services

Whenever any type of NDT is required on a shipping assignment, Satyakiran NDT Level III's can help you feel secure that it is being performed correctly. Our personnel are ready to travel worldwide to wherever your ship may be. We have qualified Level IIIs in all NDT techniques, viz: Ultrasonic Testing, Radiographic Testing, Visual Testing, Leak Testing, Eddy Current Testing, Magnetic Particle Inspection, Liquid Penetrant Testing, and Acoustic Emission Testing. These personnel have over 15 years of Industrial experience, are well traveled around the globe and are masters of their subject.

6. Electrical and Instrumentation Inspections

Satyakiran Inspectors can serve as your eyes and ears for these assignments. These committed personnel ensure that you get from your suppliers, precisely what you had ordered. Satyakiran offers graduate engineers in Electrical, Instrumentation, Electronics and Communication Engineering for these jobs.

7. Coatings and Wrapping Inspections

Paint, coatings and rapping inspection has become a major part of any construction project and to ensure satisfactory protection it is necessary to monitor all the stages of painting, mixing and coating. Satyakiran provides painting and coat wrap inspectors to various clients in order to achieve the control on contractor's quality. The items that should be checked during any painting works are as follows: cleanliness, temperature, humidity, dew point, roughness of surface mixing, thickness of layers and adhesion of each layer, the correct colour and all painting defects, fisheyes etc. Satyakiran has equipment required for inspection of coatings or wrappings such as:

- Spy holiday detectors
- Thermometers (steel temperature)
- Wet thickness gauges
- Dry thickness gauges
- Air thermometers
- Hygrometers
- Alco meter

B. NDT TESTINGS: (SECOND PARTY AND SHUT DOWN JOBS)

We are one of the most qualified NDT companies in the country with our Engineers holding ASNT, ACCP and PCN certifications in Level I, II and III. Our policy is to invest in full time staff to ensure that our services are consistently of the highest standard. We provide our customers with a high quality NDT service, at an affordable price, through an ongoing system of Quality Improvements in all areas of the company's activities. We promote cooperation internally between divisions and individuals and externally between our staff and our customers and suppliers.

We are registered service providers to companies like IOCL, NFL, NTPC, ONGC, WIL, L&T, MUKAND, etc. We claim unparalleled experience and expertise in NDT of heavy castings (up to 80 Ton single piece) and heavy forgings, along with repair monitoring. Our engineers have a wide exposure in new as well as periodic in service inspection of welds of pressure vessels in Petrochemical, Fertilizer and Boiler application.

We specialize in annual shutdown testing, dynamic balancing (on site) and Vibration Analysis including R.L.A. (Residual Life Assessment) jobs of Sugar Mills, Petroleum refineries and thermal Power Plants.

We provide on site several NDT testing services, with our engineers using state of the art equipment, viz:.

1. Ultrasonic Testing

Crack detection & thickness monitoring for corrosion thinning

2. Radiographic Testing

(X-Ray & gamma ray)

3. Magnetic Particle Testing

(Including Fluorescent)

4. Liquid Penetrant Testing

(Including Fluorescent)

5. Eddy Current Testing

6. Visual Testing

7. Hydro Testing

8. Leak Testing

9. Vibration Analysis

10. Dynamic Balancing

11. Hardness Testing

12. Holiday Testing

C. TRAININGS:

SATYAKIRAN SCHOOL OF NON-DESTRUCTIVE TESTING

In just over a decade, Satyakiran has trained and certified more than thousand Professionals in the field of Non-Destructive Testing in India, Middle East, and South East Asia.

All the Certifications are in accordance with SNT-TC-1A of ASNT. We train & examine independently. We also train personnel as per ISNT, EN 473 and other sector specific standards. Our trainees are from all major industry segments, including Airlines, Railways, Cement, Pipes, Inspection Agencies, Automobile, Heavy Engineering, NDT Service Providers, Agriculture, Paint, etc. Beneficiaries of our trainings include all Airlines, since Directorate General of Civil Aviation accepts our certification.

Listed below are courses that we run all around the year.

1. Radiographic Testing
2. Ultrasonic Testing
3. Magnetic Particle Testing
4. Liquid Penetrant Testing
5. Visual Testing
6. Leak Testing
7. Eddy current Testing
8. Infrared Thermal Testing
9. Welding Inspection
10. General NDT Course for Inspectors
11. Codes and Standard interpretation

Please contact our course Administrator for reservations.

The trainings can be held on-site at your factory premises on your machines and specific to your product requirement also. In addition to carefully crafted artificial defect reference samples; the school has an impressive library of exclusive natural defect samples from real life new product manufacturing and in-service failures. Product forms and industry sectors who have contributed to this cause for education include heavy and light precision castings, forgings, formed products, rolled products, extruded, drawn and threaded products, SMAW, SAW, HFIW, SPOT, SEAM, GMAW welds in pipes and plates, heat treatment faults, mechanical and thermal loading failures etc. Materials include ferrous, alloy and stainless steels, lead, copper, brass, aluminum, white metal, tin, magnesium, zircon, glass, polarized and glazed ceramics, stone etc.

For QMS and motivational trainings contact Satyakiran Quality Consultants P Ltd.

TRAININGS

We conduct Lead Auditor and Internal Auditor trainings for budding Auditors. Focused companies who require specific skill building trainings for their quality personnel opt for our training services to conduct internal trainings for their people in

- ISO 9001:2000
- IS/ ISO 14001
- IS 15000
- IS 18001
- API Q1
- ISO/TS 16949
- Kaizen
- 5S
- Six Sigma
- Benchmarking
- 7 QC Tools
- Statistical Process Control
- Time Management
- Personality development
- Assertiveness
- Winner ship
- Negotiating

The faculty comprises of IRCA registered Lead Auditors and API authorized auditors, well respected trainers and motivators, and matured successful personalities from industry.

For training and certification to NDT Level-I and Level-II in Nondestructive Testing methods, contact Satyakiran Engineers Pvt Ltd. For information on the training unit “Satyakiran School of Non Destructive Testing” – India’s only ISO 9001: 2000 certified NDT institute.

CONSULTANCY (QMS / EMS)

We provide Consultancy for **ISO 9001, ISO 14001, IS 15000 (HACCP), ISO 18001 (OHAS), ISO/TS 16949, 5S , Six sigma & SA 8000**. A brief description of the work we do while implementing these systems are given below: -

ISO 9001: We provide consultancy for Quality Management System, ISO 9001:2000. This includes establishing Quality policy and Quality objectives for the organization. Preparation of Quality Manual, procedures and formats, its implementation, conducting Internal Quality Audits so as to prepare for the certification audit and conducting Management reviews along with trainings, form an integral part of our QMS services.

ISO 14001: Environmental Management System, ISO 14001 is focused in terms of requirements for a specific policy for environmental issues, aspects identification for setting objectives and targets, besides compliance with applicable legislative and other regulatory requirements. We ensure that our client gets complete value for money and the system is effectively implemented.

ISO/TS 16949: It is a common supplier standard for automotive manufacturers. Apart from ISO 9001:20000 standard, it includes Production Part approval process, continual improvement, manufacturing capabilities and customer specific requirement. We ensure that our clients start working in 100-ppm levels, when they associate with us.

IS 15000 (HACCP): Hazard Analysis and Critical Control Point is a process control system designed to identify microbial and other hazards in food production. It includes steps designed to prevent problems that occurred and to correct deviations as soon as these are detected. Our clients are assured of the very best services in the industry when they associate with us.

IS 18001 (OHAS): This is Occupational Health and Safety Management System wherein the organization develops systems, taking into account the Health and Safety aspects of all the personnel concerned.

SA 8000: Social accountability Standard ensures that all organizations irrespective of their geographical locations and size shall comply with the law of the land and ensure that everyone in their supply chain is also not discriminating between people on the basis of caste, creed, age, gender or coercive means.

Six Sigma: It is a statistically derived performance of operating with 3.4 defects per million opportunities. It is a business strategy that can directly attack the cost of poor quality. We ensure that our clients reach this level within one to one and a half year of association with us.

Experience — the type of experience we have in ISO 9000 QMS consulting

CONSULTANCY (ERP / MIS)

You can trust our Microsoft trained ERP implementers for simple, complete and thorough solution finding in your organization when they sit through days and nights customizing the AXAPTA and SAP platforms for your needs. Our experts have deep exposure in Logistics, Materials management, Production planning, Finance, Supply chain management, inventory control, warehousing and sales modules.

Clubbed with the rich QMS consulting and auditing experience, our software development engineers are competent in setting up a tailor made MIS for your QMS and EMS systems documentation, records, information flow and data analysis needs.

CONSULTANCY (PROJECTS / FINANCE / EXIM)

When you have to set up a new project, acquire properties, need clearing house services, or need links and confidence in foreign trade – we are at your service with over 20 years of expertise and extensive networking of resources behind our people.

AUDITS:

The auditing services offered by us include:-

- Second party QMS and EMS audits by certified auditors
- Energy audits by Bureau of Energy Efficiency trained auditors
- Chartered Engineer (registered) audits for process waste assessment
- Valuation audits for imported machinery by approved Valuers
- Systems and capability audits for Vendor assessment & approval
- ASNT NDT Level- III audits for procedure approvals
- System security audits for information systems (by CISA; DISA)
- Finance audits by certified chartered accountants and experts.
- Certified and registered QMS auditors for third party certifying bodies.

International standards we deal in but not limited to

- ISO 9001:2000
- ISO 14001
- IS 18001
- IS 15000
- TS 16949
- API Q1
- SA 8000
